BUDIAWAN PRASOJO

Computer Science (Software Engineering) Student | Aspiring Software & Data Engineer
Bekasi Timur, Jawa Barat, Indonesia | budiawan234111@gmail.com | 081111805647 | linkedin.com/in/budiawan-prasojo-48a080379 | github.com/BudiawanPrasojo

PROFESSIONAL SUMMARY

Computer Science (Software Engineering) student at BINUS University with hands-on experience building web applications and data dashboards using React, JavaScript, PostgreSQL, and Supabase. Has built multiple independent full-stack projects covering mining operations monitoring, port logistics, and healthcare data visualization, along with applied machine learning work using Python. Seeking a Software Engineering, Data Engineering, or Data Analyst internship, with particular interest in enterprise systems, logistics, and mining/industrial technology.

EDUCATION

BINUS University *2024 – 2028*
Bachelor of Computer Science, Software Engineering

SMA KORPRI Bekasi

TECHNICAL SKILLS

Programming Languages: JavaScript (ES6+), Python, HTML5, CSS3, SQL

Frontend: React, Vite, Tailwind CSS, React Router, Chart.js, Responsive Web Design

Backend & Database: Supabase, PostgreSQL, REST API integration, Authentication & Role Management

Data Analytics & ML: Exploratory Data Analysis (EDA), Logistic Regression, Linear Regression, Data Visualization, Pivot Tables, Microsoft Excel

Tools: Git, GitHub, Vercel, Figma

PROJECTS

STRATA — Smart Tactical Resource & Analytics Platform *May 2026 – Jul 2026*
- Built a portfolio dashboard simulating mining operations monitoring, covering equipment tracking, tactical mapping, shift handover logs, safety monitoring, and fuel tracking.
- Designed a reusable frontend component architecture with React, Vite, Tailwind CSS, React Router, and Chart.js, backed by Supabase for data storage.
- Deployed the application via GitHub and Vercel; fully responsive across desktop and mobile.

NexPort Nexus — Smart Port Control Center *May 2026 – Jun 2026*
- Built a logistics monitoring dashboard modeling container operations at Port Tanjung Priok, including shipment tracking, congestion visualization, and vehicle/driver tracking.
- Extended an HTML5/CSS3/JavaScript frontend into a full-stack application by integrating Supabase for authentication, role-based access, and CRUD operations on logistics data.
- Implemented an interactive analytics dashboard using Chart.js for real-time shipment data.

Mining Block Profitability Analysis Using Machine Learning *Feb 2026*
- Conducted an end-to-end data science analysis in Python to identify economically viable mining blocks and quantify the impact of cut-off grade on profitability.
- Applied Exploratory Data Analysis (EDA), cut-off grade classification, Logistic Regression for feasibility prediction, and Linear Regression for profit forecasting.
- Achieved a regression model with $R^2 \approx 0.86$, translating the results into actionable recommendations for block selection.

Gnosia — Health Consultation & Disease Prediction Platform *Apr 2026 – Jun 2026 | BINUS University*
- Built a responsive frontend UI in vanilla HTML5, CSS3, and JavaScript with a glassmorphism-based design.
- Developed visualization components for machine learning outputs, including confidence score indicators and feature importance charts.

Clash Of BaNG — Game Community Website *Mar 2026 – May 2026 | BINUS University*
- Developed a responsive game community website using HTML, CSS, and JavaScript, with UI designed in Figma.
- Implemented troop showcase, gallery, registration form, and responsive navigation for desktop and mobile.

EXPERIENCE

Event Division Staff (Rundown Subdivision) — TECHNO 2026, HIMTI BINUS University *May 2026 – Present*

- Authored event rundowns covering both ideal and contingency scenarios for a large-scale university event, coordinating across multiple teams.

Event Operations Staff — HISHOT 2026, HIMTI BINUS University *Mar 2026 – Present | Part-time*

- Supported technical operations and logistics for seminars and workshops, ensuring smooth on-the-ground execution.

Registration & Fundraising Committee Staff — HIMTI Makrab 2026, HIMTI BINUS University *Mar 2026 – May 2026*

- Coordinated participant registration and payment tracking end-to-end under deadline pressure.

Technical Support — Entry & Registration Operations (HIMTI KIT | HILET 2026), HIMTI BINUS University *Dec 2025 | Part-time*

- Managed and maintained participant registration data using Google Forms and Google Sheets.

Leadership Development Delegate — AIESEC Future Leader, AIESEC *Oct 2025 – Dec 2025 | Internship*

- Completed a 3-month youth leadership development program focused on leadership, teamwork, and cross-cultural collaboration.
